Wireset Ordering Information

Four colors of wire are available. The wiresets are all mechanically the same, and fit 1961-69. I use an 8mm Silicone jacketed wire with a magnetic suppression center core. This gives low resistance and good radio protection. I use Silicone boots on the plug, and snap-in seals that stay in place, sealing the air flow into the shroud. My wires are slightly longer than the stock wires and should clear any carb mods.
All colors are the same price, $50. The 1960 sets are an additional $2, due to material costs. I also supply special Smog/Air Conditioning motor "coil" wires. They are a couple of inches longer, making it easier to reach the rear mounted coil in safety. The longer coil wire is a no cost option for all wires sets. I charge only actual US Postal Priority Mail costs ($11) for shipping for one or two sets, no "handling" or boxing costs. If the set is shipped to an address in California, please add $5.00 sales tax. (see below)

Four colors of wire are available:

Blue, Red, Yellow and, of course, Black!

Thank you for your inquiry. Just print out the page, fill it out, and send it in with a check! Or E-mail to me at sethracer@aol.com Be sure to provide your mailing address.
